

OSHA 521 OSHA Guide to Industrial Hygiene

Class Time: 8:00am to 4:00pm

• April 6-9, 2021

Virtual Instructor Led Training (VILT)

For device requirements visit: www.oshamidatlantic.org/virtual-instructor-led-training/

This course is intended to increase your knowledge of OSHA regulations related to industrial hygiene as well as relevant industrial hygiene practices and procedures. You will learn to minimize the threat of illnesses by learning industrial hygiene practices and related OSHA regulations and procedures. You will understand how to recognize potential health hazards in the workplace and define terms relating to OSHA health requirements. From workshops in health hazard recognition to air contaminant sampling, this course will give you the information you need to combat occupational illnesses.

Topics include

- Permissible exposure limits
- OSHA health standards
- Respiratory protection
- Engineering controls
- Hazard communication
- OSHA sampling procedures and strategy
- Workplace health program elements.

Objectives

Students who successfully complete this course will be able to:

1. Interpret requirements of OSHA health standards.
2. Recognize potential health hazards in the workplace.
3. Perform basic health hazard evaluation using OSHA sampling procedures.
4. List acceptable strategies for controlling hazardous conditions.
5. Describe the elements required for an effective workplace health protection program.
